

YANKEES CLIMB ON DOUBLE WIN

New York Now at the Top
of American League
Again

CLEVELAND LOST
HARD TO TIGERS

Pittsburg Just Holding On
to First Place in
Nationals

New York, Sept. 2.—The New York Yankees climbed into the lead in the American league by a double victory over Washington yesterday, while Cleveland was losing a hard-fought 12-inning battle to Detroit. The Pittsburgh Nationals, though retaining their first place position, suffered a double defeat and the New York Giants, despite a contest lost to Brooklyn, gained a half game on the Pirates. The two rivals in each league are tied on games won but each runner-up has dropped two games more than the leader.

The Washington Americans have lost seven straight games. Johnson, the Senators' star, was hit for five consecutive singles before a man was put out in the fourth inning of the second game.

BASEBALL NOTES.
Double-Header in Boston on Labor Day—Captain Scott in 800th Game.

Boston, Sept. 2.—A double header will be played Labor day afternoon between the Red Sox and New York Yankees, it was announced to-day. This program will take the place of the scheduled morning and afternoon games.

Boston, Sept. 2.—When Captain Everett Scott of the Red Sox takes the field as shortstop against Philadelphia, he will have played in 800 consecutive major league games. His continuous play, long since a record, started June 20, 1916. If world series contests and exhibition games were included it would be at least 30 games greater. The modern record for continuous play was held formerly by Fred Luderus of the Philadelphia Nationals, who in 1919 completed 333 consecutive games. The longest known previous record or organized baseball, 577 games without a break, was made by George Pinckney of the Brooklyn American association team over a period from 1880 to 1890.

BIG DEMONSTRATION BY LONDON'S IDLE

Thousands Participated in Plans Drawn Up to Emphasize Serious Conditions.

London, Sept. 2.—Demonstration in which many thousands of London's unemployed participated occurred last night, and marked the culminating point of the unrest among the idle which had prevailed here during the past fortnight. Several members of the borough council of Poplar, a section of London, were arrested and lodged in Brixton prison for refusing to raise the tax rates in accordance with an order from the London county council, which had taken action to raise funds to care for the destitute. The arrest of the remainder of the council members, some of them women, was expected to-day. The Woolwich board of guardians was asked by a deputation of a monster demonstration to pay 25 shillings a week to each unemployed man and wife, with an additional dole of eight shillings for each child. Demand was also made that rents should not be collected from men out of work. These demands were rejected by the board. Several men who had spent Wednesday night in a workhouse in Hackney, refused to leave in the morning. They were arrested and later sentenced to a week's imprisonment.

FRANCE HAS NEW TURMOIL

Entire Cabinet May Resign
As Result of Dissatisfaction

HEAD OF FINANCE
AT LEAST MAY GO

Paul Downer's Part In International Financial Agreement Criticized

Paris, Sept. 2.—Premier Briand's cabinet is declared by the Echo de Paris to face what amounts to a crisis. Paul Doumer, minister of finance, is likely to resign as a result of yesterday's cabinet meeting in which he was criticized when the subject of the inter-allied financial agreement of August 13 was discussed. The newspaper says that Louis Loucheur, minister for liberated regions, may replace him, and that a senator may take M. Loucheur's portfolio.

It is also possible that the whole will resign, it is declared, so that Premier Briand may rearrange his ministry more easily. In any case, however, the crisis is expected to be brief, and may be settled before tonight. The financial agreement has been strongly criticized in parliament and in financial circles, and it is probable the cabinet will decline to ratify it.

Cost of Emigration.

Our guess is that the 5,000,000 Germans who appear in a news item as prospective emigrants really exist. It would be surprising if no more than that number wanted to escape the difficulties which now surround the Germans of moderate and small means. But in view of the fact that the cost of a voyage to one of the Americas is in the neighborhood of 10,000 marks per person, it is more than doubtful if a tenth of the number quoted are able to afford the expense of the trip.

The total cost of the migration of the number quoted would be nearly as much as the total monetary issues of the German government, even including the tremendous inflation that has taken place since the war. Add to that the fact that each emigrant is allowed to take 30,000 marks, tax free, and it appears that the fears of the German government are largely illusory. There is not enough money in Germany to pay the cost of emigration on the scale reported, and there are not enough Germans outside of Germany to aid greatly in such an exodus.—Baltimore Sun.

All Alike.

"What is the meaning of the word 'fan,' which I see so often in the press accounts of your sporting events?" asked the visiting Englishman.

"A fan," explained his American cousin, "is man who sweats by the same team when it is winning and at it when it is losing."—Pittsburg Gazette-Times.

DETOURS.

Plans About Them by the Vermont Highway Department.

In constructing highways under present conditions, occasions arise where traffic has to be diverted over detours, and while detours are often objectionable, they are a necessary evil. By properly marking a detour and maintaining it by the patrol system, the inconvenience to travel can be greatly reduced, and with this idea in mind the Vermont state highway department has adopted a standard system of marking detours, both by day and by night, on the main lines of travel.

When a road is closed or a bridge is up, a large white sign with black lettering is erected at both ends of the closed road at the point where the detour begins. These signs are provided with a red flag to attract attention during the day, and red and white lights at night. They also give information as to the length of the detours, and the names of the towns beyond the closed road. Travel is directed over the detour during the day time by standard black arrows on a yellow background, and at night by a green light. These arrows are placed at all road intersections along the detour.

In order that the traveling public may know conditions, the detour signs will be erected only when the road is closed. Where the road is not closed, the state highway department has adopted a yellow sign, which reads: "State Road Construction—Passable but Unsafe."

The department is making an effort to minimize the unpleasant features incident to highway improvement, and desires the co-operation of the public in protecting all signs and lanterns used in this work.

The detour around the Rutland federal aid project has already been marked with the new system, and in the near future, the South Burlington and Vergennes detours will be designated by the standard signs.

The Daily Newspaper is an Instant Force

WISE national advertisers are not making long-time commitments these days. Conditions are changing too rapidly.

What may have been a bad market yesterday may be a good one to-morrow.

What might be a fair price to-day may be low or high a week hence.

Alert merchandisers are marshalling their selling forces so they can have the right men on the right spot at the right moment.

In times like these there is no force so adaptable to the problems of the manufacturer or national distributor as newspaper advertising.

The national newspaper advertiser can change his appeal overnight. He can

move from one market to another instantly.

He can start here or stop there. He can make every advertising dollar count one hundred cents efficiently.

In no other medium except the daily newspaper can he have like advantages.

The daily newspaper is the medium of complete adaptability, just as it is the medium of immediate results.

Manufacturers and distributors interested in the problems of modern merchandising are invited to write to the Bureau of Advertising, 306 World Building, New York, for a copy of the book, "National Advertising and the Newspapers."
